DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment filed on March 9, 2006. Claims 1-7, and 9-12 remain pending.
2. Claim 8 was objected to as being allowable subject matter in the previous non-final rejection on December 12, 2005. The claim was cancelled and moved into the independent claims 1,9, and 10.

Allowable Subject Matter

3. Claims 1-7, 9-10, and 12 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

The limitation which was inserted into the independent claims, indicated as allowable subject matter in the preceding Office action (dated December 12, 2005), provided the definition of the truncator as being $r^m - 1 / r - 1$, where m is the extension degree of a finite field over which the elliptic curve is defined. The Cited Prior Art (CPA) does not teach using such a truncator based on a Frobenius mapping to compute a point multiple. Therefore, claims 1-7,9-10 and 12 are allowed over the CPA.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claim 11 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim is directed towards a data carrier, which is not explicitly defined in the specification. The term "data carrier" is a broad term that encompasses both computer readable media, such as magnetic or optical discs, or non-statutory subject matter such as paper or a carrier wave. When a claim encompasses both statutory and non-statutory embodiments, the claim as a whole is considered to be non-statutory.
